STATE OF PRESERVATION GOOD									
DESCRIPTION									
Layer of brown soil inside room 21 B, descending W to E, with medium stones in the middle. It was easy to distinguish by the above layer - It has been cleared, but not excavated. We can see on the upper surface some fragments of animal bones, tiles and other frag. of pottery.

OBSERVATIONS

maybe this is the natural soil as when this put the best soil
(274) so is a base.
