STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) *The stratigraphy in this area is rather suspicious because contexts 838 and 839, contexts that we thought might have a continuous relationship with 840, did not. 840 appears to be covered by 839 and its relationship with 838 (which is on the other side of the cut) is not clear*

(840 does not seem to extend around the cut as far as the SW corner).
