TYPE (positive, negative, wall) positive	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Fill of pit under foundation trench in Courtyard near junction of walls 50 and 265		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) The fill was a loose brown soil w/ many flecks of charcoal. The dimensions @ surface were 85 cm (NWSE) x 1 m (NESW) and \approx 25-30 cm in depth. There was a concentration of charcoal in the top western inside edge of pit. A paleobotanical sample was taken, but it is highly possible that the charcoal and organic remains were from bioturbation (tree?).
