

SITE CHO65R	YEAR 06	ROOM # or AREA NAME Courtyard	CONTEXT NUMBER 0869
TYPE (positive, negative, wall) positive	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Fill of pit in corner of walls 265 and 692 in North Courtyard Area 1		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) The soil was compact crumbly & brown w/ very little bone and small to medium pieces of ceramics. The cut was discovered while cleaning for photo ^{v of Area 2} and some of the context was covered by a hard layer of what appeared to be eroded bedrock and other parts were covered by conserved 'wall', which in my (and Adams) opinion is fill & not a wall. The sides were steep but the pit was shallow with a flat ^{modern} bottom surface.

STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) Context in color and vaguely in composition (?) looked similar to 0830. Unsure of relationship to 0770, but it may be associated with the cut 0771. This context was covered by earth 0703 or 0759 entered as 759 (best guess)
