

SITE C106	YEAR 2006	ROOM # or AREA NAME Courtyard	CONTEXT NUMBER 0752
TYPE (positive, negative, wall) Pos.	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Fill in N Courtyard, <sup>close to</sup> corner made by walls 265 & 693.		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) Compact dark grayish brown silty loam. Incl. tiles, ceramics <del>shards</del> , bones, stones. The top of this context was photoed on the NW area of the open trench, but b/c we excavated through most of it on the NE area it was not included in the photo. Context 752 does not extend all the way across the balk but is on both sides of it. Context <del>752</del> is $\approx$ 15-20 cm in depth. <del>752</del> in Area 1 and 2 but becomes thinner in Area 3. $\angle$ 5cm.

INTERPRETATION Possibly a surface/accumulation. Adam believes that this context is the equivalent of #0509, but I am skeptical. I think it covers 0509 * Equal but without the industrial debris from metalworking activity below it (which is what gives 0509 its color + consistency).

STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) Context 763 was actually 'in the corner' made by walls 265 & 693 and context 752 abuts wall 265 & is between that & the well. Some modern fill covered this context ( $\approx$ 5 cm). Context extends			
DATE 24.VI.06	INITIALS SM	CLOSED (tick)	

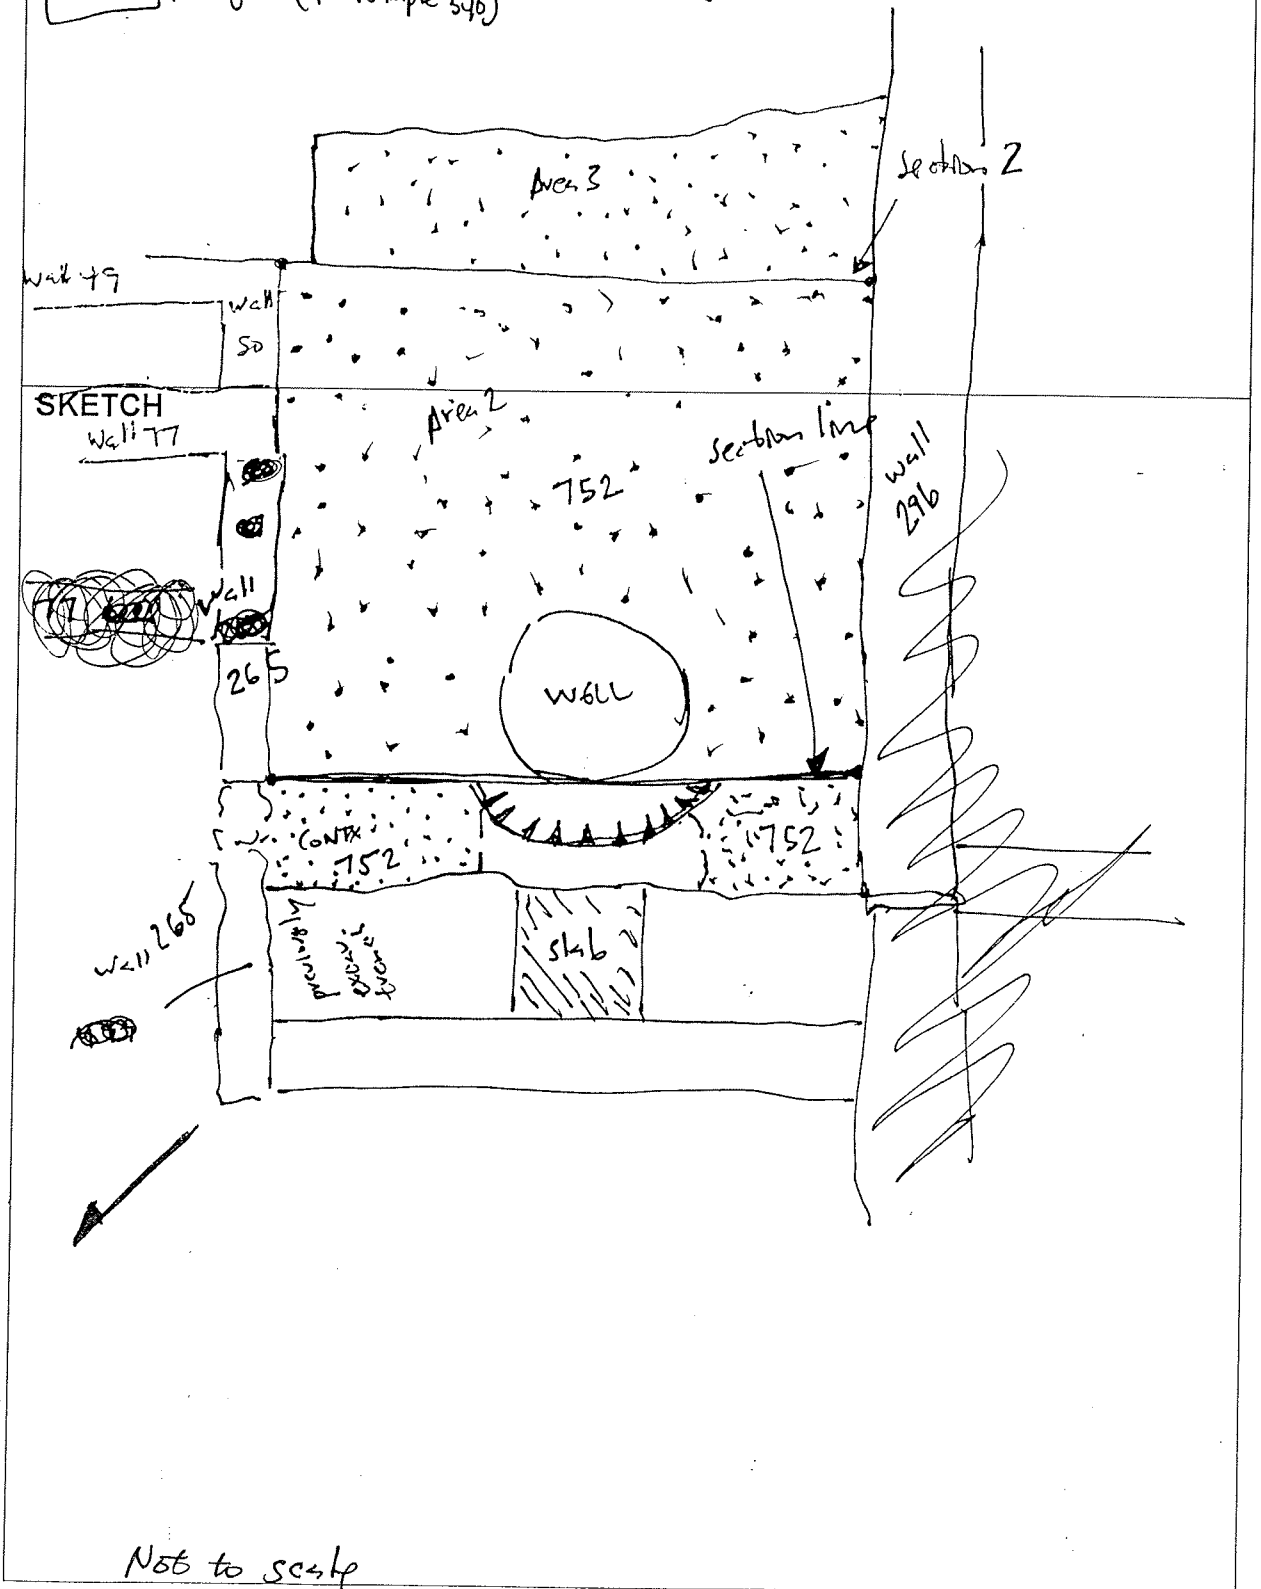

~~This context~~ extends to the W towards ~~the~~ the balk left between the well and the previously excavated trench, over the surface between section 1 and section 2, (extended a 1/2 of the way into Area 3. There is debate on whether or not this context equals 509.
