TYPE (positive, negative, wall) Wall	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Wall course associated with hearth 0882, Area 3 Courtyard		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) very tenuous remains of a wall (?) next to the pit next to the cistern; only one course of dry stone with mud and rubble chinking preserved, perhaps at the corner of the wall (a large block with a slightly more regular corner might have served as a quoins) - this wall sits on 929 and was covered by 883, was probably cut by 943 (at its corner, outside face is preserved on that side)
