STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) The layer was rich of pottery and we have recorded on higher number of special finds than the trampling surface (610). So it could be that it was as a earlier trampling surface.			
DATE 26.VII.2005		INITIALS Iq	

The layer was bonded with 650, that is surely a structure
