

SITE CH06SR	YEAR 06	ROOM # OF AREA NAME Courtyard	CONTEXT NUMBER 0886
TYPE (positive, negative, wall) positive	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Dark brown soil parallel & adjacent to wall 296 Area 3, Courtyard		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) Loose dark brown soil w/a $\approx$ extent of 3.1 M (NW-SE) x 20-30 cm (NE-SW) and no more than 15-18 cm in depth. It becomes less distinct and more shallow as we worked towards section 2. - unclear if this is a fill in a cut that cuts 759, or a somewhat different soil in a depression at the edge of the courtyard; photos, however, suggest fill of cut			
MUNSELL COLOR 7.5YR 3/2	dark brown

ABUTS	ABUTTED BY		
EQUALS	BONDS WITH		
INTERPRETATION Possibly a wall trench, but it so it doesn't appear to extend to the base of the wall. - seems very likely to be related to wall construction, especially because both wall & tiles in area appear to be cut at same edge			
MATERIAL DATABLE IN FIELD? (if yes, specify) ceramics (amphorae) suggest 12-13th		PRELIMINARY DATE same edge

SPECIAL FINDS (number and description, continue on back if necessary)
FLOAT? (Y/N)	SAMPLE? (if yes, # and type)	SECTION? (Y/N)	
PHOTO? (Y/N)	PLAN? <input checked="" type="radio"/> 102	NOTEBOOK PAGES SM: 29-31, 39	SKETCH ON BACK? <input checked="" type="radio"/>
STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) Potentially a wall trench, lots of tile, but seemingly shallow w/a more compact, more <del>distinct</del> artifacts - /w/ level below. This cuts the colony gray layer associated w/ the wall course (hearth?) (0882)
