STATE OF PRESERVATION									
DESCRIPTION									
<p>The layer has been recognize during the documentation of US 333. It is a very thin layer like a "pellicle" between US 333 and US 234. It is has not been excavated but the primary hypothesis is that it is <del>ask</del> a layer of ash over a <del>low</del> layer of burnt soil <del>or the</del></p>
