STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) We did not recognize this context prior to opening up to section 2. This could be due to the disturbance caused by the modern trench and/or the exploded bomb found in context 0703. After a wknd of rain and removing context 0759 we noticed the extent of the trench was regular and not narrowing towards section 2. This was below the level of context 0804, so we are unsure if we missed the cut or debris from. This is the most likely explanation.
