Explanation of Pottery Cataloguing Procedures
and Classification.

page

From June 1, 1981 through June 10, 1981, the same categories were used as those from Pizzica 1980

Beginning with PE-81-767L we began discarding all miscellaneous body sherds, and some coarse ware body sherds. We saved a representative group of coarse ware sherds from each pottery lot, and noted the number of them discarded.

Huge Storage Classification was begun with PE-81-767L as well, mostly for amphora body sherds, and pithos sherds.

On June 11, 1981 some of the classifications were changed, and some were added.

Other glazed thin was added to create a place to record numbers of thin or fine wares which were slipped or glazed and were not either gray ware, black glaze or terra sigillata.

Cookware was changed to burned coarse or burned ware to create a classification for all cookware plus wares which were burned, but were not definitely cookware, and were not classifiable in other categories.

Table ware was changed to unglazed thin or unglazed thinner, and placed under coarse wares. This accounts for all coarse + semi-fine (powdery) unglazed or unslipped ware sherds which are not finer than thin, but are also not thick enough to be classified as storage vessels.

Storage was changed to med-thick semi-fine + coarse ware to account for all the coarse + semi-fine body sherds which are thicker than those in the unglazed thin category, but were not huge amphorae or pithoi.

Glazed medium coarse and semi-fine was added to account for sherds which had slip on them, but were either med. thick or coarse ware.

June 24 1981 PE-81-557PL is the last pottery lot from Pizzica that was catalogued. The rest, from June 25th through July 3rd 1981 were numbered (after washing), bagged and sent to Casa Teresa. All of the special finds were removed and catalogued as special finds. Please note that there are probably many vessels in many fragments in the pottery lots from the ceramic deposit in the W. mt. of N. S. Trench and the N. W. Trench. There were not enough people to make joins or restore them.

Please note that many sherds were kept that could very likely have been discarded if there were an authority on the local or Italian pottery present. The categories for the pottery types were kept very general for the same reason.

1981 Pizzica - General Catalogue

The majority of initials in the catalogue were C.P. - Chip Pennington, the trench master at Pizzica.

J.C.C. appears in the pages for San Bragis 1981 as does J.H. —

Joseph Coleman Carter and John Hayes.

G.H. and T.B. are Gloria Howell and Tom Boyd, architects.

Cataloguing was done by Jennifer Brubaker. She was often assisted by Stephen Wolokojian and Lucilla Burn. Anna Keys catalogued almost all of the grayware special finds after June 25th 1981.
