Subject: Re: carcasses/ timing of shipping

There will be 3 boxes (somewhat insulated) containing at least 30 marten, 6 mink and 2 weasels. There could be as many as 40 marten (the trapper indicated he had caught 10 more from when I talked to him last and he may have added the carcasses to the batch);

P.S. I should mention that there is a separate bag containing 3 mink from Toponce Creek, east of Pocatello and the date should be on the label. John Contor, Blackfoot, Idaho (trapper along Toponce).

All other bags (without a labels) include animals caught in Island Park, Idaho (west of West Yellowstone, Montana) during the month of November. Todd Smith, Idaho Falls, Idaho (trapper in Island Park).
