Albuquerque, NM 87131

Greetings:

The Alaska Department of Fish and Game, Division of Wildlife Conservation, Furbearer Research Program has entered into collaborative research with Molecular Evolution and Ecology Lab (co-PI, Joseph Cook, Division of Mammals, co-PI Mariel Campbell, Division of Genomic Research) to evaluate the parasites in stomachs from American marten. The samples ADF&G is providing will be catalogued in the Museum of Southwestern Biology (MSB) for our collaborative research and archival purposes. These marten stomach samples are under ADF&G's proprietorship and may only be shared with others after written request and review by Kerry Nicholson as there is ongoing research.

Sincerely,

A handwritten signature in black ink that reads "Kerry L. Nicholson".

Kerry L. Nicholson
Furbearer/Carnivore Biologist III
