Invoice No.: V-19
Date: 18 June, 2014
Loan Period: N/A (consumptive)
 Prepared by: Emily M. Braker
 Approved by: Dr. Christy McCain

MATERIAL (As appropriate, state catalog numbers, name, locality, collector, etc.)

Tissues sampled from 29 *Cynomys gunnisoni* study skins and skulls in the UCM Mammalogy Collection (specimen list attached)

Purpose: Neutral and adaptive genetic diversity review based on genetic analysis (11 microsatellite loci and a 270 base pair region of the DRB locus of the MHC to be sequenced)

Instructions: The investigator should return any unused material or DNA byproducts. Please inform Zoology Section of any resulting GenBank Accession numbers or associated publications. In all cases of publication, the **University of Colorado Museum of Natural History Vertebrate Collection** must be cited as the source. The specific catalog number(s) in conjunction with the collection acronym (e.g., **UCM 12345**) should be indicated where appropriate.

Total No. Specimens: 29 tissue samples

Loans are made for six months unless stipulated above. When returning material, please mention the original invoice number. Types sent on loan must be returned by Registered Mail or UPS.
