Purpose: Histological reproductive examination

Instructions: Keep the specimens hydrated in 70% ethanol and in secure locked storage while not in use. The investigator is permitted to make a small ventral-abdominal incision to assess reproductive condition and to remove one gonad from each specimen for histology slide preparations. Obtained sex data must be reported back and slides returned to UCM. Other types of destructive analysis or tissue sampling are not permitted without Collection Manager's prior approval.

Note: Second loan installment (first loan returned on 16 April, 2015)

Total No. Specimens: 20

INSTRUCTIONS TO RECIPIENT:

Keep the specimens hydrated and in 70% ethyl alcohol in a secure locked storage while not in use.

Loans are made for six months unless stipulated above. When returning material, please mention the original invoice number. Types sent on loan must be returned by Registered Mail or UPS.

Received in good condition by:

Steph A. Bradley

Date 8/24/15

Thanks !!

PLEASE SIGN, DATE AND RETURN to CU Museum
