## SPECIAL NOTE

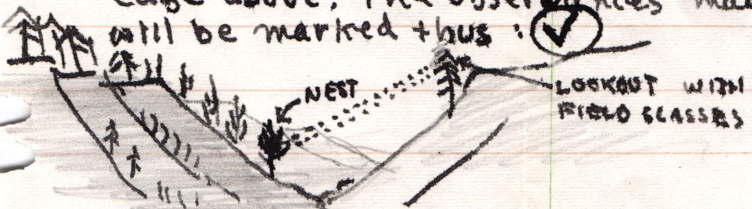

~~PROCESSED~~  
BALD EAGLE NEST  
(MARCH 31, 1960)

~~The~~

this nest was built for the first time last year and I discovered it in Fall - the old nest. This year the birds have returned to the nest and have built on to it.

Due to the location of the nest, it is impossible to watch and visit the nest too often. But it can be observed - even its contents - by field glasses from in a tall tree either next to it or from the canyon edge above. The observations made per glasses

will be marked thus:

THIS IS AN ILLUSTRATION TO SHOW THE NEST LOCATION

SPECIAL NOTE

BALD EAGLE NEST  
(MARCH 21, 1960)

20  
21

~~The~~ nest was built for the first time last year  
and discovered it in fall - the old nest.

BALD EAGLE

Due to the location of the nest, it is impossible  
to watch and visit the nest directly. But it can  
be observed - usually through the field glasses from  
a hill the other side of the canyon  
above. The observations made per glasses  
will be marked thus:

DO NOT WITH  
FIELD GLASSES
