Subject: RE: Shipping specimens

Thanks,

The specimens are supposed to arrive by 3pm Wednesday. The FedEx tracking # is 806461202115.

I have attached a list of the specimens. I wrote more detail on some of the individually bagged specimens (date, sex, location). I'll have to look harder, but I also wrote down weights, sex, and measurements for the beavers and the one Gravina otter. I just have to relocate the notebook I wrote them in.

Here are some of the general details for the collected specimens

Revilla Samples:

(most specimens) Mouth of Carol Inlet 55.34545/-131.44653 to Coho Cove 55.27327/-131.36683

(deer) mature male from Connell Lake, 55.42283/-131.67598

Gravina Samples:

(all) Little Bostwick Lake, 55.3087/-131.7426

Dall Island Samples:

(all) Coco Harbor, 55.039/-133.075 (everything came off that road system)

I'll keep looking for that note book and get you the beaver and otter morphometric data as soon as I can.

Kris
