STATE OF PRESERVATION									
BAD									
DESCRIPTION									
E wall of the room 30; it's a double-sides wall. It has a bad state of preservation for a 1m. x 80cm and then it's possible to see just the external side. 60cm far from the base we can see the place for the wooden-bar that is far 110cm from the base of use of the room. The lower 2 courses are made with big squared stones; above the wooden-bar the wall is thinner.
