STATE OF PRESERVATION GOOD					
DESCRIPTION Layer of dark soil with a lot of fragments of tiles and traces of coal - Near the door to the room 25 there is a concentration of organic material. In this layer there were a lot of iron nails and two iron fragments that seemed to be hinges' fragments, so that we can think that this layer has been made after the ^{door} destruction, or, maybe, the destruction of a little roof. The N trench, maybe, is an open area near the road.					
P H Y S I C A L S E Q U E N C E	SAME AS		BONDED TO		S T R A T I G R. LATER THAN 212; 179; 157
