

SITE CH055R	YEAR 2005	ROOM # or AREA NAME Complex 2 - Room 38	CONTEXT NUMBER 622
TYPE (positive, negative, wall) Positive	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Soil with inclusions of eroded bedrock.		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) Surface at the central area of the pit, extended crossly to the extension of a forementioned pit. Made up of eroded bedrock, which characterizes the white color of the layer, mixed with brown soil, bones, fragments of tiles and pottery at high concentration. Its thickness is around 5-8 cm.

STRATIGRAPHIC NOTES/DOUBTS (Include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) The layer is the same as that was found during the removal of 602. The brown, hitten surface was made up of eroded bedrock. For this reason it could be considered as part of 602.
