

SITE CH06SR	YEAR 06	ROOM # or AREA NAME Court yard	CONTEXT NUMBER 0783
TYPE (positive, negative, wall) Positive	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Soft brown loam <sup>over bedrock</sup> adjacent to wall 0692 in NW courtyard		

DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation)  
 A soft brown loam with the dimensions of 30 cm (NW-SE) and 20 cm (NE-SW) and 5 cm in depth. The layer was situated directly over bedrock and was void of artifacts except for a single piece of plaster. Uncertain how much of the context was missed because we did not recognize it until the majority of the originally named context 0783 was removed.

STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant)  
 Theoretically should be equivalent to 0715 from last season? 783 was changed from the originally identified fill that extended from wall 296 to above bed rock. Excavator found a cigarette butt in the fill, identifying it as modern backfill

originally named from last year. A profile was cut revealing an obvious break. What remained under backfill was assigned 0783.
