STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) This was first identified as one pit, but there was a distinct diff. between this and context 0855 even though they appear to be in the same larger cut of bedrock. After fully excavating it looks as if they there may be two cuts in bedrock. The rounder being 0855, the shallow square associated w/ 0845.
