

SITE CH06 SR	YEAR 2006	ROOM # or AREA NAME Room 38, Complex 2	CONTEXT NUMBER 0768
TYPE (positive, negative, wall) Positive	DEFINITION (cut in floor of X, fill of pit Y, north wall of room Z, etc.) Very compact soil in W corner of SE part of Room 38		
DESCRIPTION (include consistency, color, composition, inclusions, dimensions; for cuts, also include shape and orientation) Layer of very compact soil that lay, initially, under a large paving stone. Once the paver was removed, the soil became much more loose, and a lighter shade of brown and produced lots of small-medium sized rocks, and very large broken pieces of pythos. There were only small ceramics and bone otherwise.

STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) Although when first encountered this small section seemed like a very different, compacted layer - it may just be compact as a result of the rains and our walking with it. It covers 785 and thus may be material from 753.
