STRATIGRAPHIC NOTES/DOUBTS (include any comments on methods, contamination, excavation conditions, or anything else that seems relevant) Allyson has this context extent on plan. Because this context and 0877 were so fine they were easily mixed, there was real difficulty determining which context covered which. Finally a cut profile clearly showed 0876 over 0877. However, there may have been several alternating mixed layers of these gray and black superfine soils.			
DATE 16-VII-06		INITIALS SM	CLOSED (tick)

Does this fill the same cut as 0877?
