## SPECIAL NOTE:

RAVEN NEST  
(MCH 23, 1960)

This is ~~at~~ the same nest as last year.  
(see last year's card)

I observed the ravens through binoculars (8xwp.) most of the time. Those days on which I have observed the nest through the binoculars only I marked with ✓. This check mark I also used to indicate observations made outside the nest site, for example:

by BL (Building, Lining) I only watched the Ravens tear hair from the shedding cattle's backs. I assume, correctly, that the nest is being lined. And I watch the nest through field glasses on the opposite canyon-side; I hope this is acceptable, as it is correct and accurate.
